

Corporate Sustainability Update

For 50 years, we've been growing the tastiest potatoes and processing them into delicious potato products. Sustainability has always been a high priority at Farm Frites – after all, our chain begins on the land, and we are proud and careful of our farming heritage. We at Farm Frites therefore want to have a positive effect on nature and the environment. We've always understood that we need to take responsibility for the impact of our business operations on the environment, and we will continue to do so. Farm Frites aims to contribute to a greener, more sustainable world.

In 2020, Farm Frites has once again been fully committed to being a sustainable partner in the chain by creating and continuing initiatives such as 'Green Circles', 'CO₂-neutral fries', 'flowering field edges', 'strip cultivation', the 'Living Nature Wall' and the creation of a 'solar park'. This demonstrates that sustainability is, and will continue to be, a priority for Farm Frites, as also demonstrated by our ongoing ambitions for the future.

*Climate change & emissions**

- By 2025, our energy consumption will be reduced by 5%, and by 10% in 2030
- By 2025, we will have increased the share of renewable energy to 15%, and to 30% by 2030
- By 2030, we will have reduced carbon emissions per tonne of product by 50%

*Sustainable packaging**

- By 2022, we aim to make 100% of our packaging recyclable
- We will reduce our CO₂ footprint through packaging configuration & transport optimisation
- We aim to stimulate recycling behaviour throughout the supply chain and among end users through clear communication

*Sustainable agriculture**

- By 2025, 50% of the potatoes we source will have the FSA gold level

*Water **

- By 2025, we will have reduced water consumption per tonne of product in the factories by 15%, and by 30% in 2030

For us, these ambitions go hand in hand with proper monitoring and accountability. For this reason, we normally publish an annual sustainability report so that the impact of our efforts together with our partners is also visible.

This year Farm Frites has decided not to publish the 2020 annual sustainability report. Covid-19 has had an impact on the worldwide food service industry and caused fluctuations in product demand. In consequence, we cannot provide a consistent picture of the results of our sustainability efforts. The challenges Covid-19 has brought us have not changed our commitment to achieve our longer-term sustainability ambitions. We will keep communicating about our achievements in the future to provide

a clear picture of where we stand in our pursuit of a sustainable world. We cannot do this without our staff and our partners within the chain. We would therefore like to thank them for their tireless efforts in the area of sustainability. Together we are working on a greener, more sustainable world, both now and in the future!

Yours Sincerely,

A handwritten signature in black ink, consisting of several overlapping, stylized loops and lines.
